

Family of Starplex Pharma Line Cylinders is Available Now.

Starplex has introduced a line of HDPE cylinders from 75cc to 950cc, known as the Starplex Pharma Line Cylinders. All ten sizes are manufactured in our Toronto facility. The two smallest sizes feature a 38-400 neck, while all larger sizes share a 53-400 neck. Starplex also manufactures the 38-400 and 53-400 caps for this popular line of cylinders; caps are available lined or unlined.

Starplex's Toronto facility carries the following certifications: ISO 13485; MDSAP; IMS; FSSC 22000.

These bottles were designed for optimal line filling efficiencies. Many of the sizes share the same diameter, so fillers have faster changeovers when switching

between adjacent sizes.

The shared 53mm neck among the eight larger sizes also enables faster filling line speeds than bottles with smaller neck diameters.

Item#	Capacity	Neck Finish	Weight	Height	Diameter	Color	Resin	Machine Platform
RT075G6-3	75cc	38/400	11.5	2.905	1.775	White	HDPE	IBM
