

THE INDUSTRY LEADER IN
**SPORTS NUTRITION &
SUPPLEMENT PACKAGING**

PRETIUM

SOLUTIONS FOR A SUSTAINABLE FUTURE

PRETIUM

PRETIUM PACKAGING is the **leading supplier** of rigid packaging for the nutritional supplement and active nutrition markets, with over a dozen plants actively supplying vitamin and mineral supplement (VMS), weight management, sports nutrition and herbal products manufacturers and fillers. Because we manufacture and stock the identical bottles at multiple locations across our network, our customers have a distinct supply advantage during surges of production or when they need to ship to multiple filling locations. And, if you're also supplying to Europe, Canada or Mexico, Pretium's **global network** can meet your needs internationally.

Our industry-leading portfolio of rigid packaging solutions came about through two strategic acquisitions:

In 2016, Pretium acquired **CUSTOM BLOW MOLDING**. CBM was known as a leader in jars and canisters for the sports nutrition market for over a decade. The CBM brand had a unique position in the market, and was trusted as a resource for product innovation. Since Pretium's acquisition, the CBM business has capitalized on its vast capabilities and manufacturing locations, enabling expansion of its coast-to-coast footprint and extension of its product portfolio into market adjacencies such as closures and light-weighted containers, all made from FDA compliant materials.

In 2021, Pretium expanded our position in the wellness segment with the addition of **ALPHA PACKAGING**. Known as the market leader for PET vitamin packers and gummy packaging, Alpha also brought an extensive portfolio of HDPE rounds and oblongs. Alpha is well-known for core product lines which are replicated at plants across North America and Europe, so customers with multiple filling locations can align their purchasing with their regional fillers. Today, the product lines traditionally associated with the Alpha brand are manufactured in more than a dozen plants across the globe.

SPORTS NUTRITION | HDPE

Through the CBM brand, Pretium is a leader in **high density polyethylene** (HDPE) sports and active nutrition packaging.

Our core product lines are manufactured in plants across North America, and samples of most stock items are available through our website at pretiumpkg.com/products.

HDPE 89mm Jars

BOTTLE STYLE	NECK FINISH	SIZES AVAILABLE
Cosmetic Jar	89-400	16oz, 19oz
Jar with Lip	89-400	14oz, 15oz, 16oz, 17oz, 19oz, 20oz, 25oz, 32oz, 33oz, 40oz
Jar with Large Lip	89-400	14oz, 15oz, 16oz, 17oz, 19oz, 20oz, 25oz, 32oz, 33oz, 40oz
Smooth Jar	89-400	14oz, 15oz, 16oz, 17oz, 19oz, 20oz, 25oz, 32oz, 33oz, 34oz, 36oz, 38oz, 40oz, 42oz, 55oz
Smooth Jar	89-445	16oz, 20oz, 25oz
Smooth Jar	89mm Pano	16oz, 19oz, 25oz, 32oz, 34oz, 38oz, 42oz
Square	89-400	32oz

HDPE Canisters

BOTTLE STYLE	NECK FINISH	SIZES AVAILABLE
Canister with Lip	100-400	32oz, 40oz, 44oz, 46oz, 48oz

CUSTOM CAPABILITIES

Pretium can take a concept sketch through the design phase, solid modeling, prototyping and mold manufacturing prior to readying it for production. We are **leaders in packaging innovation** and are driving trends in the industry with our sustainable packaging solutions for bottles, jars, canisters and closures.

With a wide variety of shapes, neck finishes and container sizes, there is a very good chance we can produce a stock item that meets your needs. However, when a more **custom solution** is required, we will collaborate with you to make sure the end product you receive meets your exact specifications. Pretium can take your idea from **concept to commercialization within 8 weeks**.

As packaging leaders in the sports nutrition and nutritional supplement industries, Pretium has developed a deep understanding of co-manufacturers in both segments. Our extensive network of world-class contract manufacturers spans the US, Canada, Mexico and Europe. If you have chosen a co-man for your product line, chances are we already work with them which will enable a seamless introduction and product launch. If you are looking for a co-man for product formulation and filling we can provide references and connect you with the leading co-mans in your desired geography. We will help navigate your options and guide you to a partner who has the packaging you require for maximum efficiencies.

SUSTAINABLY DESIGNED

Whether your brand's sustainability goals are driven by a desire to protect the environment or a need to comply with government or retailer requirements, Pretium offers options to help your brand become more sustainable.

MATERIAL TYPE

Incorporating post-consumer resin (PCR) into your packaging is one of the fastest, easiest and most impactful ways to put your product in a more sustainable package. It's also among the most preferred and most recognized sustainable packaging solutions with consumers.

Pretium can incorporate 30%, 50% or 100% PCR into our PET and HDPE containers, and can also incorporate lesser amounts of PP PCR into jars and closures. Choosing the optimal PCR percentage for your packaging depends on several factors and may require a balance between aesthetics, costs and compliance with external requirements.

CONTAINER LIGHT-WEIGHTING

Reduce dimensional and shipping weight through structural engineering and packaging materials. Some light-weighted packages use 30% less material than the packages they replace.

PALLET CONFIGURATION

Increasing the bottle count in the stack pattern gets more bottles on a truck for maximum shipping efficiencies.

CLOSE TO CUSTOMERS

Our manufacturing sites are strategically placed to help minimize freight expense and fossil fuel use.
